“Machining Blue”

paste on the flanks of a pinion

Tube 0.55 oz

DYKEM® Hi-Spot Most recognized and trusted high spot bearing and gear locator in the world.

Dykem® Hi-Spot is an intensely blue, soft, uniform paste that spreads easily and evenly to show high spots on bearings. It's most valuable when used on flat bearing surfaces of lathes, planers, milling machines, etc. A thin coating may be left on the surface day in and day out, and will not dry out. The film remains "wet" and "transferable", and in condition for months. No night clean-up or morning rebluing is necessary.

Remover, Cleaner, and Thinner

The preferred solution for all surface preparation, removal, and dilution of Dykem® Staining Colors.

Dykem® Remover, Cleaner and Thinner cleans and prepares work piece surfaces. It has been proven that layout fluids and stains adhere better to surfaces that are prepared with this product. It also serves as an all-purpose industrial cleaner that can remove grease, dirt, and oil on most work materials. **Remover, Cleaner, and Thinner Benefits**

- Unique formulation dilutes stains for thinner coatings
- Contains no hazardous chemicals such as 1,1,1-trichloroethane, chlorofluorocarbons or chlorinated solvents
- Dries in minutes
- Cleans most plastics and glass in minutes
- Thoroughly cleans and prepares metal surfaces
- Removes Mark & Code and Fine Line Marks

DYKEM® Steel Red

Dykem® has long been the world's best-known and most trusted line of metal fluids.

Machine shop operators depend on Dykem Layout Fluids to scribe sharp, clear, precise lines.

When applied, our layout fluids provide a uniform deep color that prevents glare and dries in 2 to 4 minutes.

Dykem offers layout fluids in six colors. All Dykem Layout Fluids provide an extremely thin film coating which adds practically no thickness to the work piece material, yet remains flexible without cracking and chipping.

Each Dykem Layout Fluid is resistant to synthetic coolants, soluble oils, kerosene, gasoline and toluene.
